

The screenshot shows the Dev Journal website. At the top, there's a navigation bar with links like 'Home', 'About', 'Contact', 'Search', and 'Login'. Below the navigation bar, there's a section titled 'All tags' with a list of tags including 'AWS', 'React', 'Node.js', 'Python', 'JavaScript', 'PHP', 'Java', 'C++', 'C', 'C#', 'Go', 'Rust', 'Swift', 'Kotlin', 'Scala', 'F#', 'Elixir', 'Clojure', 'Lua', 'Perl', 'Ruby', 'Python', 'JavaScript', 'PHP', 'Java', 'C++', 'C', 'C#', 'Go', 'Rust', 'Swift', 'Kotlin', 'Scala', 'F#', 'Elixir', 'Clojure', 'Lua', 'Perl', 'Ruby'. The main content area features a grid of colorful sticky notes. The first sticky note is titled 'How to solve code deployment issues in no longer supported on AWS' and includes a link to 'AWS Lambda'. The second sticky note is titled 'Mindful Chemistry in Your Life' and includes a link to 'Mindful Chemistry'. The third sticky note is titled 'Eyes and Pregnancy' and includes a link to 'Eyes and Pregnancy'. The fourth sticky note is titled 'Benefits of Daily Meditation' and includes a link to 'Benefits of Daily Meditation'. The sticky notes are arranged in a grid that mimics a physical sticky note board.

camelCase

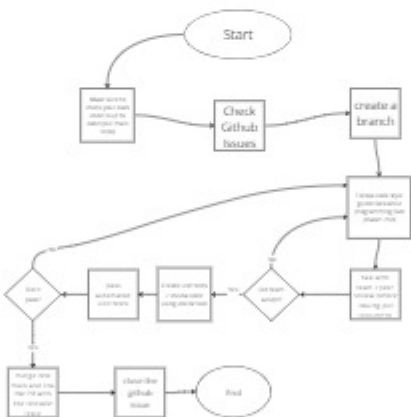

camelCase

no magic numbers

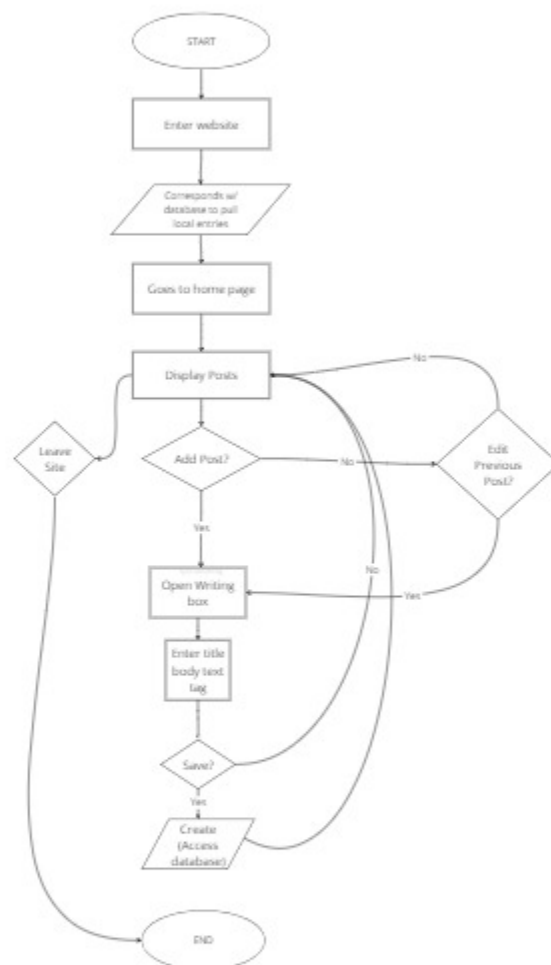

```
Functions() {
    like this;
}
```

Comment I/O above
each function
(javadoc
convention)

tab for indents

- flat writing
- short or basic tags
- easy way to make new posts in comment
- easy way to connect authors, authors can see number of their followers
- short sentences
- no hashtag
- tags are not tags
- no more tag or text about
- no social engagement

Q&A

Q: What are the local island impacts for big water boat?

At select multiple is not simple to use.

*As with the
overall data,
agreement with
these leaders*

Q: What is the best way to display many tags?

Q: Should I do array > local storage > global?

Nicer: Get one tag per post fire
