

Dev Journal Pitch

Group 34

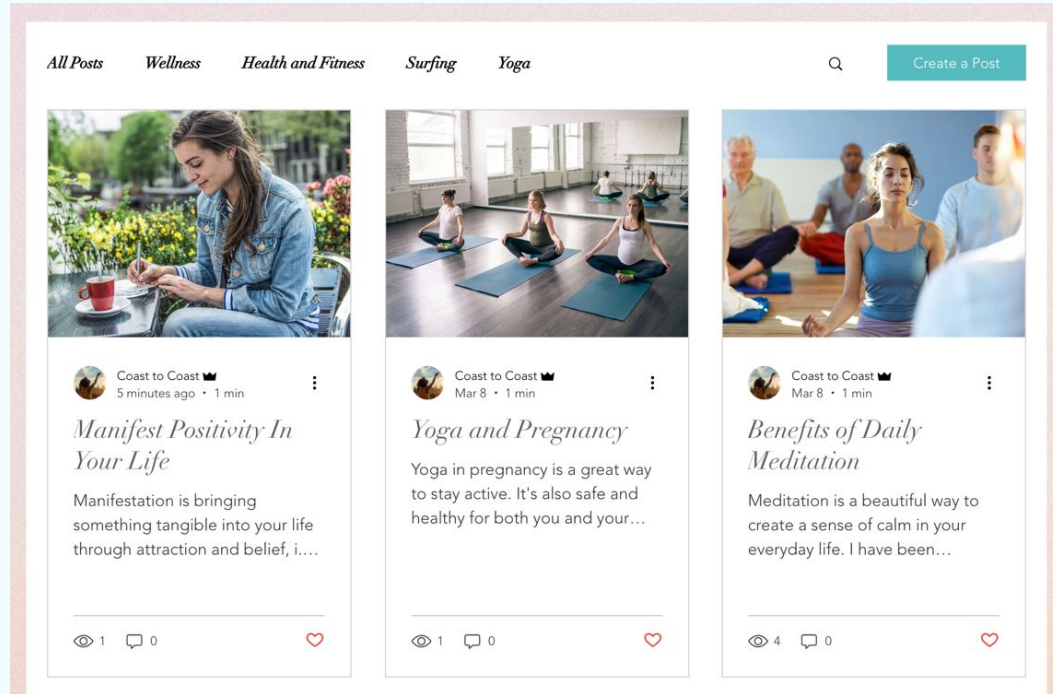

Shaping

Problem Statement

Dev Journals are necessary for building and maintaining skills as a software developer. We are taking a local-first approach to make our application more simple and accessible.

Introducing Product

Going over features

MongoDB local database

Add dates (gcal? popup calendar?)

Upload / delete posts

Add tags to post

Sort by tags

Methodology

Finding software, inspiration for UI, planning sprints, testing etc.

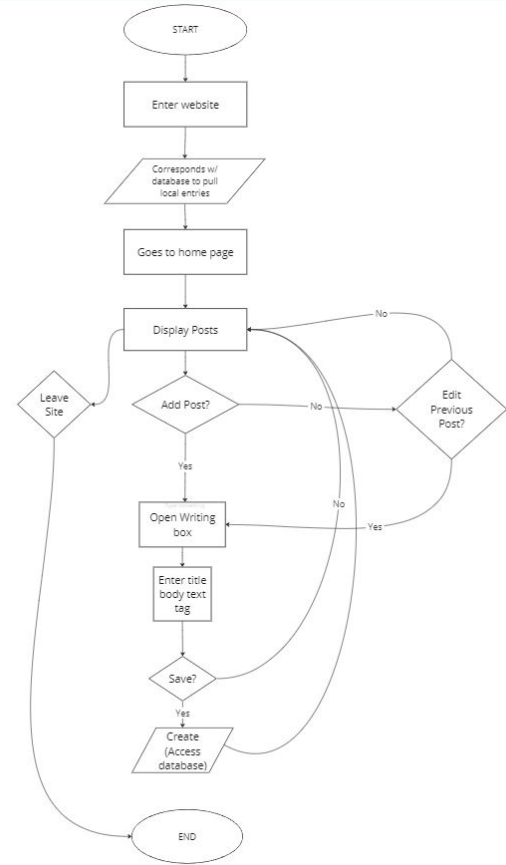

Ask abt local database (mongodb?)

OR SQLite?

Diagram

Risks

- Insecure data storage

Rabbithole

- Trying to implement too many features
- Issues with databases
- Adding tech we don't need
- Spending too much time delegating

Questions?
